

Global Superstore Sales Analysis

Preferred by: Nikita Naganath Gomare

Page 1 - Project Overview

This Power BI project analyzes sales performance across regions, categories and customer segments. It uses Power BI, DAX and Power Query for business intelligence and data visualization.

Page 2 - Objectives and Tools

Objectives:

- Analyze sales trends.
- Identify profitable categories.
- Create interactive dashboards.

Tools Used: Power BI, DAX, Power Query.

Page 3 - Outcome

The project converts raw sales data into meaningful business insights and helps in decision making through interactive dashboards.
